

Lead Developer Microsoft Business Intelligence / Data Warehouse (f/m)

as a full time employee in Munich, Germany

The company XAD spoteffects GmbH and its product spoteffects

spoteffects is the first independent TV-to-Web Analytics tool, that merges TV advertising data with webtracking data using an elaborate algorithm, bridging the gap between TV and web, in order to allow TV media planners to optimize their TV-to-Web campaigns. spoteffects allows fast and comfortable analyses of the effect of TV advertisement on websites and mobile apps via an easy to use frontend.

spoteffects is the product of the company webeffects GmbH. We are a fast growing startup with a dynamic and highly qualified team. We are the market leader in our field in Germany and we analyse TV advertisement all over the world.

Your tasks

- Enhancement of an innovative software-as-a-service business intelligence tool based on webtracking and tv advertising data
- Requirements gathering, architecture, development and quality assurance covering the entire DWH/BI stack from the data sources to the end user interface, especially including complex algorithms
- Data modelling, planning and optimization of a data warehouse based on MS SQL Server

Your qualifications

- University degree in informatics or business informatics, or comparable education
- Very good communication skills in English (German is an advantage)
- At least six years of experience in the area of data warehousing (DWH) / business intelligence (BI), ideally mainly with Microsoft technology
- Very good knowledge in the area of data modelling, ETL and data architecture
- Very good knowledge about MS SQL Server (database engine, SSIS, SSAS)
- Experiences in data visualization, evaluation and analysis using Power BI or comparable technologies
- Experiences in web development would be an advantage
- Analytical, structured and solution-oriented approach, readiness of mind
- High interest in software development and in new challenges

Our offer

- You contribute significantly to the development of a sophisticated software-as-a-service tool, which is the product of the company, and not just some backoffice tool
- You gain valuable experiences in the collaboration with highly qualified experts
- You become part of a dynamic and ambitious team with fun at work

Your application

If you would like to apply for this job, please send your application including your cv, cover letter, possible start date and salary requirements to Jasper Sasse at js@spoteffects.com.
